Agriculture and Natural Resources Cooperative Extension

UC Cooperative Extension San Mateo & SF Counties Elkus Ranch Environmental Education Center

1500 Purisima Road
Half Moon Bay, CA
October 29, 2017, 10:00am-2:00pm

Get the dirt on the UCCE! Discover our agriculture, nutrition, and environmental programs for adults and youth. Join us for a day of science and learn more about our wonderful programs. We will explore agriculture, nutrition and environmental education and research through hands-on activities presented by UC Cooperative Extension advisors, staff and program volunteers. So much to discover! [Read more & Register](#)

GARDENING TIPS

November

Weather permitting, many of the October garden activities can continue into November. There's still time for fall planting of shrubs, trees, and perennials before the winter rains arrive. Winter rains will help the new plantings to establish good root systems. Cool-season vegetable seedlings can be planted such as cabbage, kale, chard, and spinach. Also, carrots may be seeded now. Remove dead or diseased limbs from trees and shrubs. If you are putting away your garden tools for the winter, first give them a good cleaning. Rub with alcohol after each use to prevent the spread of disease. Prevent rust with a light coating of lubricant grease (such as lithium grease). Shovels and saws may be stored in a bucket of sand with a little oil (5 parts sand to 1 part oil). Control slugs and snails with an organic, pet/animal- and food-safe slug bait.

YOUTUBE VIDEOS

Build Your Own Hoop House

Learn the principles of frost protection and learn how to build a simple structure called a low tunnel to start your plants early, or grow through the winter. [View Video](#)

FREE CLASSES & CLINICS

Drip Irrigation Made Easy – Emitter Line Basics

Growing Roses Organically on the Peninsula

Lyngso Garden Materials, Inc.
345 Shoreway Road
San Carlos, CA
November 18, 2017, 10:00am-12:00pm

Easy to install and easy to maintain, emitter lines (also called drip lines) are a popular new type of drip irrigation. In this class, we'll start with an overview of drip irrigation. You'll learn how to convert your existing sprinkler or drip system to emitter lines. We'll talk about how to schedule your drip irrigation for different types of plants; how long to run and how often. Bring your questions about choosing, installing, maintaining and scheduling drip emitter lines. [Read More & Register](#)

The Wonderful World of Succulents

San Francisco Richmond Public Library
351 9th Avenue
San Francisco, CA
November 18, 2017, 1:00pm-2:30pm

After a brief overview of the natural history of succulents, there will be a discussion about succulent care and culture, including soils, pots, watering, and light. Small succulent gardens in pots will be on display to show how arrangements can be made. Some small pots of succulents will be available as handouts after the presentation. No registration is necessary.
